CAREER OBJECTIVE

Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning, with a strong interest in applying machine learning techniques to solve real-world problems. Skilled in Python and core programming concepts, with hands-on experience through academic and personal projects in fraud detection and AI-based systems. Seeking opportunities to learn, contribute, and grow in a technology-driven environment.

EDUCATION

Bachelor of Engineering (B.E) – Computer Science & Engineering (AI & ML)
SVIT, Rajanukunte, Bengaluru
2023 – 2027
CGPA: 7.8 / 10

Pre-University Course (PUC)
Nagarjuna Pre-University College, Yelahanka, Bengaluru
Percentage: 84.7

SSLC
Nalanda High School, Doddaballapur
Percentage: 83.5

TECHNICAL SKILLS

Programming Languages: Python, C, C++, Java (basic)
Databases: MongoDB (basic), SQL

SOFT SKILLS

Analytical thinking and logical reasoning
Problem-solving ability
Strong grasp of theoretical concepts with practical application

PROJECTS

Dynamic Fraud Detection System Using Machine Learning
Designed and implemented a machine learning model to identify fraudulent transactions. Addressed class imbalance using SMOTE to improve prediction accuracy. Integrated the trained model with an API-based real-time prediction system, focusing on minimizing false positives while maintaining detection efficiency.

CERTIFICATIONS

Artificial Intelligence: Concepts and Techniques
NPTEL 12-week certification course

TRAININGS AND WORKSHOPS

Completed a workshop on Artificial Intelligence and Machine Learning using Python

ACHIEVEMENTS

Patent application filed for an academic mini project
Research paper published based on project work

LANGUAGES KNOWN

English, Kannada, Telugu, Hindi

EXTRA-CURRICULAR ACTIVITIES AND INTERESTS

Actively participated in NSS activities
Interested in exploring emerging technologies, experimenting with AI tools, and listening to music
