

# Monish S

BE, Computer Science & Engineering (AI/ML)

+91-9035414932

monishhh0725@gmail.com

## EDUCATION

- **Sai Vidya Institute of Technology, Bengaluru** 2023 – 2027  
BE, Computer Science & Engineering (AI/ML) CGPA: 8.75
- **MES Kishora Kendra PU College** 2021 – 2023  
II PUC (PCMB) — Karnataka State Board 88%
- **B.P. Indian Public School** 2021  
10th Standard — ICSE Board 83%

## EXPERIENCE

- **Amdox Technologies** Nov 2025 – Dec 2025  
UI/UX Intern Bengaluru  
– Designed and iterated UI prototypes in Figma; built a student-centric task management platform with an AI-powered assistant, integrating user research, multi-view workflows, and intuitive UI/UX to optimise productivity.

## PERSONAL PROJECTS

- **AquaIntelligence – AI-Powered Geospatial Insurance Platform**  
*Technologies used: Satellite Imagery, OCR, Computer Vision, Twilio, Drone-IoT, FastAPI*  
– Engineered an AI geospatial platform detecting undisclosed swimming pools from satellite imagery and classifying natural-calamity damage (flood, fire, seismic, storm) for automated insurance risk scoring, with OCR fraud detection and Drone-IoT on-site verification.
- **RescueWave – Emergency Alert System**  
*Technologies used: LSTM, Vosk Speech Recognition, Twilio, SMTP, OpenCV, MediaPipe*  
– Designed an LSTM-based gesture detection and Vosk speech recognition pipeline for real-time distress classification; built multi-channel alerts (Twilio voice/SMS, SMTP email) targeting vulnerable groups in high-risk environments.
- **Livora – AI HealthGuardian (Wearable Health Monitoring System)**  
*Technologies used: IoT Sensors, FastAPI, TensorFlow, AI Chatbot, Web Dashboard*  
– Built a smartwatch-inspired IoT system for heart rate and blood pressure monitoring with AI cardiovascular risk prediction, biological age estimation, multilingual support (Kannada), and emergency ambulance dispatch pipeline.
- **AiVara – Intelligent Agriculture Framework**  
*Technologies used: Satellite Intelligence, IoT, ML, Weather API, Computer Vision*  
– Engineered a 5-element precision agriculture platform integrating soil & environmental monitoring, weather intelligence, pest/disease detection, and smart irrigation; extended with satellite intelligence for real-time crop health and early risk detection.
- **SnapSolve – Telemedicine Platform for Rural Healthcare**  
*Technologies used: Python, Computer Vision, NLP, Full-Stack Web*  
– Full-stack healthcare platform covering symptom detection, medicine availability, fake-medicine identification, expiry reminders, smart pill-box simulation, and virtual doctor consultation flow.

## TECHNICAL SKILLS AND INTERESTS

**Languages:** Python, C

**AI / ML Libraries:** TensorFlow, Keras, LSTM, Scikit-learn, Pandas, NumPy, Matplotlib, OpenCV

**Computer Vision & IoT:** MediaPipe, Gesture & Speech Recognition (Vosk), FastAPI, IoT Sensor Integration

**Web & Data:** MySQL, MongoDB, Power BI, Figma

**APIs & Tools:** Twilio (SMS/Voice), SMTP, GitHub

**Areas of Interest:** Computer Vision, Health Tech, IoT Systems, Agri-Tech AI, Emergency Response Systems

## ACHIEVEMENTS

- **HackS'US Edition V, RSET Kochi – AquaIntelligence** 1<sup>st</sup> Place
- **24-Hr National Hackathon, Vemana Institute of Technology – Aquix** 1<sup>st</sup> Place
- **HackMarch 2.0, KLE SNC Bengaluru – Livora AI HealthGuardian** 1<sup>st</sup> Place
- **HACKVERSE 2026, Department Hackathon, SVIT – AiVara** 1<sup>st</sup> Place
- **Mini Project Expo, SVIT – RescueWave** 1<sup>st</sup> Place, Patent
- **Department Hackathon, SVIT – SnapSolve** 2<sup>nd</sup> Place

## CERTIFICATIONS

- **Generative AI Foundations** AWS Academy
- **Foundations of Artificial Intelligence** IBM
- **Artificial Intelligence: Techniques and Concepts** NPTEL
