Bangalore – 560092

OBJECTIVE

3rd year B.E. Electronics and Communication Engineering student with a strong foundation in embedded systems, IoT, and core electronics. Passionate about building real-world solutions by integrating hardware and intelligent systems. Experienced in project development, hackathons, and technical workshops with a focus on innovation and system-level thinking.

EDUCATION

- **Sai Vidya Institute of Technology, Bengaluru** 2023 – 2027
BE, Electronics & Communication Engineering CGPA: 7.45
- **MES Kishora Kendra PU College** 2023
II PUC — Karnataka State Board 72%
- **MEC Public School** 2021
10th Standard — CBSE Board 75.4%

ACADEMIC PROJECTS

- **Breathe Safe – Smart Mask for Toxic Gas Detection**
Technologies used: Gas Sensors, Embedded Systems, Microcontrollers, Alert Mechanisms
 - Designed a smart wearable mask to detect harmful gases in real-time using embedded gas sensors.
 - Implemented alert mechanisms for hazardous environments targeting industrial and public safety applications.
 - Focused on practical deployment and reliability in toxic exposure scenarios.
- **AI-Powered Embedded Code Generator**
Technologies used: Embedded C/C++, Natural Language Processing, I2C, SPI, UART, Microcontrollers
 - Developed a system to convert natural language instructions into optimized embedded firmware (C/C++).
 - Integrated communication protocols (I2C, SPI, UART) with real-time code generation and validation.
 - Demonstrated strong integration of AI and Embedded Systems with automated documentation support.
- **Disaster Sense AI – Environmental Data Fusion for Disaster Prediction**
Technologies used: Machine Learning, Computer Vision, Real-time APIs, Data Fusion, IoT
 - Engineered a multi-hazard prediction system integrating ML, computer vision, and real-time API data.
 - Leveraged data fusion techniques combining flood modelling, fire detection, and seismic risk analysis.
 - Designed a scalable alert framework and end-to-end intelligent dashboard for disaster preparedness and response prioritization.

TECHNICAL SKILLS AND INTERESTS

Programming: Embedded C, Basic Python
Core ECE: VLSI Basics, Digital Electronics, Analog Circuits
Embedded & IoT: Arduino, Microcontrollers, Sensor Integration, Communication Protocols (I2C, SPI, UART)
Tools & Platforms: Circuit Design, Debugging, Embedded Firmware Development
Areas of Interest: Embedded Systems, IoT Solutions, Industrial Safety Tech, AI-Embedded Integration

ACHIEVEMENTS

- **MindSpark Mini Project Expo 2025, SVIT – Breathe Safe** 1st Prize
- **Inventronics Hackathon – ECE Department, SVIT** Participant
- **HackS'US Edition V, RSET Kochi** Participant
- **Patent on the project “Breathe safe”** Published

TRAININGS & WORKSHOPS

- **MindSpark Mini Project Expo 2025** SVIT
- **3-Day Workshop on Tech & Research – Brain to Bots** SVIT
- **Workshop on Entrepreneurship & Innovation** SVIT
- **Research Paper Writing & Journal Publication Workshop** SVIT
- **Grant Proposal & Technical Paper Writing Workshop** SVIT

EXTRA-CURRICULAR ACTIVITIES

- Participated in NSS activities including Cancer Awareness and Tobacco-Free campaigns.
- Contributed to a 7500-sapling plantation drive at ASC conducted by Bosch.
- Hobbies include listening to music and playing Badminton.
